DDW-194

WEEKLY ACTIVITY AND STATUS REPORT FOR THE DD/ICS--26 November 1986CIPC Organizational Activities

25X1

- A CIPC meeting is scheduled for 8 December. SDI [] will be the primary agenda items.
- Jim was on leave for most of the week. He will be in on 28 November to prepare for the off-site conference.

-We have prepared, for your and Jim's use, several background papers. These background papers focus on the topics presently on the off-site agenda.

25X1

SDI - []

25X1

25X1

25X1

25X1

- The CIPC report on Intelligence Support to the SDI has been redrafted in accordance with your comments and suggestions. Additionally, changes suggested by the Vice Chairman, and Executive Secretary, CIPC, the Intelligence Producers Council staff, and some of the Working Group members, have been incorporated. [] has discussed the report informally with [] of the SDIO and Rich discussed it with the SAFSS and IPC staff. [] wishes it were more critical of footdragging at DIA and on the ICS--insufficient attention [] wishes it were less critical of the existing requirements system. The study will be forwarded to CIPC members, within the next few days, preparatory for the CIPC meeting on 8 December.

Rich has also reviewed the PPS SDI package submitted to D/ICS for forwarding to DCI.

25X1

[]

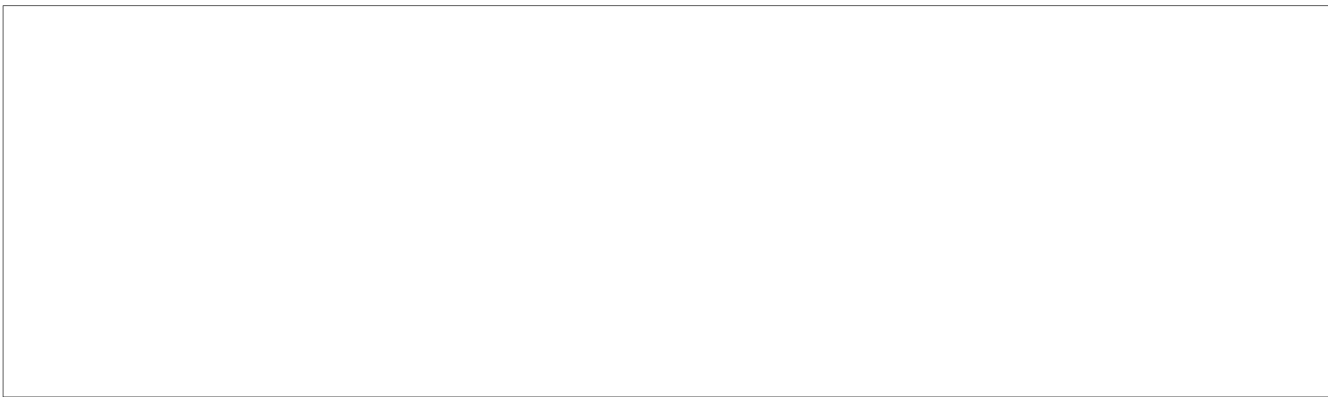

- The draft study has been completed. It was distributed to principal working group members on 25 November 1986.

NFIP Support for Limited Military Operations -

- The revised version of the study has been forwarded to working group members. It included changes suggested by DIA, State, NSA, Navy, CIA, and the NIC. A Working Group meeting is scheduled for 3 December to coordinate on the study, which no longer recommends that DIA serve as the Community focus for providing intelligence support to limited military operations.

25X1

25X1

Force Multiplier -

- Tony completed a draft of the Force Multiplier study, and it is presently being typed. It will be distributed to the Working Group representatives on 26 November for a coordination meeting during the week of 1 December.

Collection Strategy Evaluation Method (CSEM) -

25X1

- As you recall, last week,  briefed you on the CSEM Prototype Demonstration. CSEM is an information tool for use in managing, assessing and evaluating the Community's collection resources. This week, Ray and  met with  CIA/OIT, to discuss the specific needs for computer programming support for further development of the CSEM. Although we had been told it was very unlikely that this support could be provided from OIT's "in house" resources,  seemed enthusiastic about the project and suggested that it might be possible after all to assign someone from OIT for a one-year term. If this cannot be worked out, the only other alternative is to hire a contractor, which will cost about \$125,000.

TOP SECRET

Miscellaneous

- The DARPA-chaired report on Intelligence Technology for Low Intensity Conflict (LIC) is out for coordination and will be considered by the IR&DC for forwarding to the DDCI. Rich, who represented the CIPC on the Working Group, made a copy for  to share with the Limited Military Operations Working Group.
